Evelyn Remaley has been a recognized leader in the government and private sector – spearheading efforts on broadband funding, cybersecurity and spectrum management. Evelyn provides strategy, program management, and the ability to communicate complex subjects to her clients. She has a unique perspective that can help communications and technology companies meet evolving legal and regulatory challenges.

Evelyn most recently served as Acting Assistant Secretary of Commerce for Communications and Information and Acting Administrator of the National Telecommunications and Information Administration. At NTIA, Evelyn led a team of experts providing senior policy guidance to the Secretary of Commerce and the White House on government priorities, including broadband funding to close the digital divide, supply chain risk management, privacy, the free flow of information, encryption, spectrum, and the Internet of things. As a leader in government, she helped to advance access to innovative communications services and enhance trust and safety in the digital economy.

Prior to her work within the federal government, she led a Cybersecurity and Internet Policy Team at Booz Allen Hamilton in McLean, VA. Ms. Remaley also worked for a leading Internet service provider in its Internet Privacy and Security Federal Practice and spent time deploying the Internet across communities through her work with public libraries.

Evelyn, her husband and three children love travel, nature and adventure. During her downtime (if not at a baseball, lacrosse or crew meet!) you are likely to find her hiking, biking, or planning their next national park or world adventure.
