Will is an energy lawyer with deep and broad industry experience representing a wide array of clients, including investor-owned utilities, cooperatives, independent power producers, investors, clean-tech startups, large customers, and retail providers, in a variety of states and regulatory environments. He is able to help clients navigate both contentious stakeholder relationships and amicable ones, providing expert guidance and achieving a track record of constructive outcomes in any regulatory climate.

Utility industry leaders turn to Will for strategic advice and advocacy on energy policy issues, financial matters, strategic transactions, PPAs, project development, and enforcement. Will brings to each engagement both creativity and a wealth of experience gained from approaching opportunities and challenges from the perspectives of different industry participants, as well as from having previously held both in-house counsel and executive roles. He works collaboratively with clients and their other external team members, whether co-counsel or other strategic advisers, to achieve the best possible result for the client.

Will excels at building positive relationships with industry stakeholders, including government agencies, consumer advocates, and commercial and industrial customer groups. He has also successfully protected clients' interests in acrimonious, high-stakes litigation. In the community, he has applied the same skills in pro bono public education and civil rights matters.
