F: 202.783.5851

Will relies on his inhouse experience to better understand the needs of his clients and to help align their regulatory strategy with their business development plan. He has focused on spectrum and orbital debris safety issues, working primarily with the FCC and NOAA to support his clients' licensing and policy objectives.

Will's work has also led him to represent his clients in engagement with a number of other government agencies including the NTIA, NASA, NOAA, and the Office of Space Commerce. Will particularly enjoys learning the technical details of novel space and earth station technologies in order to identify potential regulatory issues and solutions.

Will is from Crofton, MD. Will enjoys swimming, cooking, and playing video games when he has the time.
